EZ-Strip Spacer™

INSTALLATION INSTRUCTIONS

- Open box and remove one strip, cut to length or use full strip
- Peel back paper from double sided tape to expose adhesive Fig.1
- Place EZ-Strip Spacer™ on the edge of the duct (The Manufacturer of Reflectix Insulation suggest placing spacers every 24 to 36 inches) Fig.2
- Repeat on all four sides Fig.3
- Wrap insulation around the duct overlapping the edges Fig.4
- R6 (small bubble) Use Zip-Ez Fasteners™ down the seam, (just one per foot) securing the insulation Fig.5
- R8 (large bubble) Attach as per your manufactures instructions
- Tape the seams as per the manufacturers instructions
- For larger ducts add an EZ-Strip Spacer™ down the center Fig.6
- For round pipe space EZ-Strip Spacers™ equally as shown Fig.7
